Thank you to Big Sky Energy team! Danny knows all the numbers and figured out what would be best for us and our house. His installation team was extremely professional, efficient, and very friendly. We are so excited to have the solar system by them and know that we are in good hands for anything related to our panels in the future. We most definitely recommend them!

Great price, communication was spot on, very happy with the installation and overall finish. Danny, Brett and the team were a pleasure to deal with. Ive had my first few electricity bills and it's performing even better than initially discussed. I've been in credit ever since! I would happy recommend the business to anyone that is after a solar system.

Big Sky Energy installed a new solar system after our previous one was hail damaged. They were professional, efficient and friendly in dealing with us. They also worked in well with our roofer who painted the roof once the old panels were removed. Would recommend Big Sky Energy.

From the first point of contact to the end result has never been easier. All parties involved are extremely knowledgeable and efficient. I didn't have someone out to my home harassing me and i felt involved the whole way through. The blokes doing the install don't get paid enough. Worked hard all day long on that hot roof. Everything looks tidy on my home and outstanding customer service. Please take this review as more of a recommendation to sign up to big energy.

I was lucky enough to have Big Sky Energy to replace my solar system after it was damaged by a hail storm. They did a great job, the installers were great. I highly recommend this company. I wish I had used them the first time I had a solar system installed.

Hi guys just wanted to give a big thank you to the great team at Big Sky Energy from start to finish and follow up the whole process was very well done. The team that came out to fit the panels were the most professional crew I have ever had work for me, I am a tradesman myself. The workmanship was impeccable the team were very friendly and informative letting me know every step of the process, the solar App is amazing. Thank you very much for your great work and product. Please forward this email onto the Boss. Regards Matt and Lyn Vass

I met the Big Sky Team at the Brisbane Home Show (1 of many solar companies) and was very impressed. They were the first to contact me the following week, and the only company who actually came to my home for the consultation (all the others expected me to send photos, bills, etc via email to do a phone quote). The follow up, communication, and ease of installation through Big Sky was fabulous and my new system was up and running in a very quick timeframe. A big thank you to Danny and the Big Sky Team. Definitely recommended.

The team showed up on time, fixed up the previous installation problems and completed a professional looking job. They took the time to explain what was non-compliant on our older system and also explained the faults they found with the existing inverter that failed. They even assisted with setting up the remote app on our LAN. The price was very good for a great level of service.
